
Transfer Cashmanager to a new PC

Posted by tkcm250608 - 2008/06/26 21:17

Hi. I've used CM on a standalone PC for some time. I've replaced the PC and wish to transfer to the new PC. I've installed the software OK, but this won't give me the option of importing my existing files, despite registering etc. Am I following the correct procedure? Thx

Hi

You have to start the 'New Company Wizard' and restore from backup at the first step. The new company wizard is activated by going to companies>new
